Suunto D4i

With every dive over 10 meters (30
feet), there is a three-minute
countdown for the recommended

Online Library Suunto D4i Manual

safety stop. This stop is taken in the 3-6 m (10-20 ft) range. Suunto D4i shows a STOP icon and a three-minute countdown. Page 45 In this situation, Suunto D4i adds a mandatory safety stop to the dive. The time of this stop depends on the speed violation of the ascent rate.

Suunto's Reduced Gradient Bubble Model (RGBM), utilized in the Suunto D4, predicts both dissolved and free gas in the blood and tissues of divers. It is a significant advance on the classic Haldane models, which do not predict free gas. The advantage of Suunto RGBM is additional safety through its ability to adapt to a variety
