Synchro Traffic Software Manual
The SynchroServer, a multi-threaded JAVA application, is at the heart of the Synchro infrastructure. It receives data from probes, applications, and adapters to aggregate, historize, report, and create alarms as needed. The data is sent to the SynchroServer via a trivial text TCP protocol.

Synchro Software User Guide
This guide will provide a basic understanding of how to use the Synchro 8 software package. This guide was designed to walk a user through the necessary steps to create a network simulation from opening the software for the first time to the printing the traffic analysis reports.

Getting Started: Synchro 8
Synchro Studio is a robust, easy-to-use traffic signal timing application that helps traffic engineers and transportation planners design, model, optimize, simulate, and animate signalized as well as unsignalized intersections (including roundabouts). Synchro Studio provides premier applications for traffic analysis, optimization, and simulation.
