Improving education is a huge issue for our society. Test scores, our perceived performance against different nations, and different elements have pushed education to the bleeding edge of national legislative issues, directly behind healthcare reform. Technology can be utilized to improve teaching and learning and help our students be successful.

Educational technology (commonly abbreviated as

Read PDF Technology And Testing
Improving Educational And Psychological
EduTech, or EdTech) is the combined use of computer
hardware, software, and educational theory and practice to
facilitate learning. Educational technology creates, uses, and
manages technological processes and educational resources
to help improve user academic performance.
