The Neonatal Resuscitation Program (NRP) is an educational program jointly sponsored with the American Heart Association (AHA). The course is designed to teach an evidence-based approach to resuscitation of the newborn to hospital staff who care for newborns at the time of delivery. Since the inception of the NRP in 1987, over 3 million ...

The Neonatal Resuscitation Program® (NRP®) course conveys an evidence-based approach to care of the newborn at birth and facilitates e ffective team-based care for healthcare professionals who care for newborns at the time of delivery. NRP utilizes a blended learning approach, which includes online testing, online case-based simulations, and hands-on case-based simulation/debriefing that focus on critical leadership, communication, and team-work skills.

Key Points Some newborns without any apparent risk factors will require resuscitation, including assisted ventilation. Unlike adults, who experience cardiac arrest due to trauma or heart disease, newborn resuscitation is usually the result of respiratory failure, either before or after birth. The most important and effective action in neonatal resuscitation is to ventilate the baby's lungs. Very few newborns will require chest compressions or medication. Prolonged lack of adequate ...
