Data Driven Project Management - Dassault Systèmes

In a data-driven project, the Project Manager's decisions are always supported by information taken from data using analytical processing, which is increasingly statistical. Where possible, these decisions

should be defined in advance and modeled using sets of rules that are reviewed regularly, to allow the automatic implementation of actions supporting the management.

Data Driven Project Management - ingenium

There is no data-driven product management without the PM. In his latest book, 21 Lessons for the 21st Century,, historian Yuval Noah Harari writes that "in a world deluged by irrelevant information, clarity is power." For product managers, that irrelevant information (and hopefully, plenty of relevant information) is data, coming from a ...

How to become a data-driven product manager | Pendo.io

The management of project stakeholders depends on the unique skill set, approach and personality of the project manager, but it can also be a highly data-driven process. Project managers can use data analytics to predict the outcomes of their strategic plans for stakeholder engagement management, and guide their decision if any corrective actions need to be taken.
