Nicholas Wade gives a clear, well written account of the origins and evolution of religion (note: this is NOT a knock-down of religion) with persuasive evidence that it is hereditary. He does not seek to account for the presence/absence of any deities and I recommend it for anyone with an inquiring mind regardless of their faith or lack thereof.

The Faith Instinct: How Religion Evolved and Why It ...

In *The Faith Instinct*, Nicholas Wade argues that religion is a gene-based adaptation that allowed those groups that had it to survive where those without perished, "religion" being defined as "a system of emotionally binding beliefs and practices in which a society implicitly negotiates through prayer and sacrifice with supernatural agents, securing from them commands that compel members, through fear of divine punishment, to subordinate their interests to the common good." (p.

The Faith Instinct: How Religion Evolved and Why It ...

"People of faith may not warm to the view that the mind's receptivity to religion has been shaped by evolution," writes Nicholas Wade, science writer for the New York Times, in his new book *The Faith Instinct*. If religion evolves with cultural circumstances, then it loses some of its immutable, supernatural qualities.

The Faith Instinct: How Religion Evolved and Why It ...

The star in *The Faith Instinct* is the horizontal and integrative dimension of religion, but it seems that in the developed world a combination of rampant pluralism as well as a general weakening ...

The Faith Instinct: How Religion Evolved & Why It Endures ...

Nicholas Wade's book "The Faith Instinct" is at its best when putting us through such exercises and sidelining the by-now tiresome debates about religion as a force for good or evil.

Book Review | 'The Faith Instinct: How Religion Evolved ...

"The Faith Instinct" discusses, with great care and excellent logic, recent thinking about how religion may have begun (with totally egalitarian hunter-gatherer groups some hundreds of thousands of years ago), what purpose it served (creating cohesion within groups, the better to prevail against attacks by neighboring groups), its practices (dance, music, and appeal to gods), and how it changed with agriculture and the rise of cities (no longer egalitarian, but with social stratification and ...

The Faith Instinct: How Religion Evolved and Why It ...

The Faith Instinct: How Religion Evolved and Why It Endures is a 2009 book about the evolution of religious behavior by New York Times science reporter Nicholas Wade, in which the author argues that religious behaviours have evolved through natural selection. Wade argues that religious behaviour, through shared gods and beliefs, creates social solidarity, which is the driving force in making groups of people who are not related to each other by family, comply with and enforce shared norms ...

the faith instinct how religion by wade nicholas ...

Religious instinct has been hypothesized by some scholars as a part of human nature. Support for such a position being found in the fact that "there is no known human society without something which modern social scientists would classify as religion". Theologians however have questioned the utility of an approach to religion by way of a so-called instinct; psychologists have disputed the existence of any such specific instinct; while others would point to the advance of secularization ...

Religious instinct - Wikipedia

This is what many religions, and certainly Catholicism, do. They claim that God is metaphysical and that he can intervene in the physical. In other words, God is supernatural; he created the...
