The Pipe Fitter's and Pipe Welder's Handbook (OTHER ...

A pipefitter or steamfitter is a tradesperson who installs, assemblies, fabricates, maintains and repairs mechanical piping systems. Pipefitters usually begin as helpers or apprentices. Journeyman pipefitters deal with industrial/commercial/marine piping and heating/cooling systems. Typical industrial process pipe is under high pressure, which requires metals such as carbon steel, stainless steel, and many different alloy metals fused together through precise cutting, threading, grooving, bending

Pipefitter - Wikipedia

The pipes involved in a pipefitter career are mostly in commercial, industrial and manufacturing settings. 2 These high-pressure piping systems may include hydraulic, cooling or pneumatic systems that transport water, steam, fuel or other chemicals. 3 Pipefitters may use many skills as a part of their job assembling and repairing pipes: 1,3

What Type of Welding Do Pipefitters Use? - Tulsa Welding ...

Pipe fitters plan and test piping and tubing layouts, cut, bend or fabricate pipe or tubing segments and join those segments by threading them, using lead joints, welding, brazing, cementing or...

Pipe Layers vs. Pipe Fitters | Work - Chron.com

Pipe fabrication is making all the turns and intersections using the pipe itself. The pipe fabricator cuts miters or mitres to turn at different angles and they can use two or more pieces to make the turn. You can have a two piece 90° miter or a seven or eight piece miters turns and anything in between. Fabricators can make True Ys.

Pipefitter.com > What is a pipe fitter?

A pipefitter, also known as a steamfitter, is a tradesperson trained in organizing, assembling, creating and maintaining mechanical piping systems that must withstand high pressure. These types of systems are usually industrial, include heating and cooling systems, and involve work with steam, ventilation, hydraulics, chemicals, and fuel.
