THHN, or thermoplastic high-heat resistant nylon-coated wire is most often used for connecting appliances and branch circuits. THWN or THWN-2, as it's sometimes referred to when dual-rated, functions essentially the same except for its water-resistance. Hence, the addition of the "W" in the acronym.

[THHN vs. THWN: Which Is The Better Building Wire...](#)

THWN or THHN. PVC Insulation, Nylon Jacket, 600 Volts. APPLICATION: General purpose wiring in accordance with the National Electrical Code, maximum conductor temperature of 90°C in dry locations and 75°C in wet locations, 600 volts, for installation in conduit or other recognized raceway. Also used for wiring of machine tools (stranded), ap- pliances, and control circuits not exceeding 600 volts.

[THWN or THHN - USA Wire & Cable](#)

Thermoplastic high-heat resistant nylon-coated wire, or THHN, is a common wire used for connecting branch circuits and appliances. Its counterpart is called THWN (or THWN-2). This thermoplastic heat- and water-resistant nylon-coated wire is designed to operate in the same environments as THHN without the addition of installation accessories for use in harsher environments.

[Differences Between THHN & THWN Wire | Hunker](#)

THWN is a code for thermoplastic heat and water resistant which is suitable for use in both dry and wet locations with a maximum temperature rating of 75°C (167°F). The THWN wire we carry is actually coded THWN-2 indicating its rated 90 degrees for both wet or dry locations which is even better. All of our wire here at Wire And Cable Your Way is dual rated THHN/THWN-2 which contains all of the above ratings and properties.

[What is the Difference Between THHN Vs. THWN Wire...](#)

Thermoplastic high-heat resistant nylon-coated wire, or THHN, is a common wire used for connecting branch circuits and appliances. Its counterpart is called THWN (or THWN-2). Both THHN and THWN wires are used in a variety of installations. Click to see full answer.

[Is all Thhn also THWN? - AskingLot.com](#)

THHN / THWN / THWN-2 u0026 Copper Building Wire Made in the USA, THHN is UL listed with a rated 90° C in dry locations or 75° C in wet applications with a THWN rating. The majority of THHN wire carries a dual rating on the cable marked THHN / THWN for both the wet and dry temperature rating.

[THHN / THWN / THWN-2 - Copper Building Wire](#)

THHN wire can be used in dry or damp locations where wire is exposed to condensation or moisture, such as a basement. THWN and THWN-2 wire can be used in both wet and dry environments. Flame rated VW-1 wire meets requirements for preventing the spread of flames based on a timed test with vertically suspended material.

[Type THHN/THWN Building Wire | McMaster-Carr](#)

Type THHN or THWN or MTW are copper conductors that are soft annealed copper, insulated with a tough, heat and moisture resistant, lead-free polyvinyl chloride (PVC) over which a nylon (polyamide) or UL listed equivalent jacket is applied. 6 AWG and larger are made with a friction reducing nylon. Available in black, white, red, blue, green, yellow, brown, orange, purple, pink, or gray.

[Type THHN / MTW / THWN-2 / T90 Copper Conductor](#)

THWN is rated for wet locations. As Ecnernal discusses. The issue is thermal. The difference is at the top of Table 310.15(B)(16). THWN is allowed 75 degree C running temperature. THWN-2 is allowed 90 degrees C. THHN also is allowed 90 C; Southwire is making a disclaimer: they are saying they don't guarantee #14-10 will be THWN-2. What's on their mind is a different table, NEC 240.4(D), which places artificial limits on #14, #12 and #10 wires, to limit them to 15A, 20A and 30A regardless ...

[electrical - Can 12 AWG THHN/THWN wire be placed in a...](#)

THHN wire is approved for up to 600V and is listed by Underwriters Laboratory (UL), as rated for 90° C (194° F) in dry and 75° C (167° F) in wet environments. THHN wire comes with a dual rating: THHN / THWN, which means it's appropriate for both dry and wet applications. XHHW and XHHW-2 XHHW-2 wire is the next generation XHHW wire.

[THHN vs. XHHW: What Is the Difference? | Multicom](#)

THHN/THWN-2 Copper Conductor Type THHN-THWN-2 building wire is intended for general purpose applications and may be installed in conduit, duct, or other recognized raceways in wet (60 o C oil/90 o C water) or dry (105 o C) locations.

[THHN-2/THWN-2 - Copper Distribution | Republic Wire...](#)

THHN is a designation for a specific insulation material, temperature rating, and condition of use (suitable for dry and damp locations) for electrical wire and cable. Wire with THWN or THHN insulation is commonly used in the AC electrical distribution systems throughout North America, usually at voltage levels from 110 to 600 volts.

[Electrical wiring in North America - Wikipedia](#)

Type THHN or THWN-2* conductors are primarily used in conduit and cable trays for services, feeders, and branch circuits in commercial or industrial applications as specified in the National Electrical Code2. When used as Type THHN, conductor is suitable for use in dry locations at temperatures not to exceed 90°C.

[8 THHN THWN-2 Copper Building Wire | Nassau Cable](#)

Suitable for use in conduit or other recognized raceways for services, feeders and branch circuit wiring. THHN conductor suitable for use in dry locations not to exceed 90°C.; THWN-2 conductor suitable for use in wet or dry locations not to exceed 90°C.

[THWN THHN new - USA Wire & Cable](#)

THHN stands for thermoplastic high heat-resistant nylon. Known for versatility and durability, it is the most common type of building cable. The double marking THHN /THWN-2 indicates that the wire is suitable for wet and dry conditions equally (The letter "W" means that it is water-safe).

[6 THHN THWN-2 Copper Building Wire | Nassau Cable](#)

Wire and cable pricing list for THWN-2, XHHW-2, TFN y TFFN type conductors. Our products are tested, inspected, and labeled under strict manufacturing quality controls. If our goods appear to be defective, discontinue their use and notify us promptly so that the matter may be investigated without delay.

[Wire and cable pricing list THWN-2, XHHW-2, TFN y TFFN type](#)

THHN wire is the most common type of single conductor electrical wire used in the industry. You could possibly buy THHN, THWN, THW, THHW, or THWN-2. Years ago each type was made for each specific installation, but nowadays the standard way to manufacture and purchase it is to buy the multi-rated THHN/THWN-2 version as a universal building wire.

[Buy THHN Wire Online | THHN Wire Price | Wesbell](#)

Type THHN/THWN/THWN-2 cable with soft annealed copper solid or stranded conductor,PVC insulation and nylon jacket, conforming to Standard 83 of Underwriters Laboratories, Inc. They meet the requirements of the VW-1 and CT flame test, gasoline and oil resistant, sunlight resistant. UL file No. E210924.
