In 1988, immediately after
completing his residency, he moved to
the University of Michigan and
became the first faculty member in
the Department of Neurology to be
hired in the clinical academic track. At
the University of Michigan, he directs
the required third-year neurology
clerkship and the second-year course
on diseases of the nervous system.

neuromuscular disease, memory disorders, movement disorders, neuro-ophthalmology, multiple sclerosis, sleep, and a lumbar puncture clinic.

Rotations Schedule | Neurology

Clinical neurology is the diagnosis and treatment of patients who have neurological conditions. It is a non-surgical, patient-oriented specialty practice in medicine. There are certainly neurologists who might participate in research or teaching and don't have much contact with patients. In these cases, these doctors would not be practicing clinical neurology, since clinical tends to be defined as having to do with patient care.

Clinical Neurology ...

A neurologist is a physician specializing in neurology and trained to investigate, or diagnose and treat neurological disorders. Neurologists may also be involved in clinical research, clinical trials, and basic or translational research. While neurology is a nonsurgical specialty, its corresponding surgical specialty is neurosurgery.
