Dynamics. The analysis of forces and motion in moving bodies comes in Dynamics. This branch of engineering mechanics is further divided in two branches, kinematics and kinetics. Kinematics deals with the analysis of motion of bodies without considering the forces causing or associated with these motions.

EDIT: A lot of people are asking about grades and percentages. Technically a F is a 50% or something around there. But in my case (and I ' m sure in most engineering schools), a 70% is needed to take the next course in line, so unless the 70% is obtained, you ' re retaking that course even if a D is technically passing.
