It helps maintain a consistent style, voice, and tone across your documentation, whether you're a lone writer or part of a huge docs team. It can provide guidelines for different documentation deliverables, such as API reference manuals, tutorials, release notes, or overviews of complex technical concepts. A style guide saves documentarians time and trouble by providing a single reference for ways to write about common topics, features, and more.

*Style Guides — Write the Docs*  
Also, if you're writing a "how to" or help guide, you should follow along and do a self-review to make sure everything you're writing can be done. Always remember that your technical documentation is for the user. If they can't easily navigate, read, and use what you're creating, it's useless. A few quick tips on writing well:
