Our company purchased this router and I have been trying to get it to work for 2 months to no avail. I have been told the issue is with our Cisco firewall but I have worked with Cisco TAC to resolve any such issues. The device still has a flashing red SYS light and a magenta GPS light. I can access ...

I recently purchased a Samsung Network extender and followed all of the set-up steps but the SYS light has not stopped blinking red. I've waited hours, re-booted the network extender, reconnected it to the modem and router, restarted the modem and router and placed the network extender directly next to a large window with direct access to the sky.
