the samples through a microscope for further analysis. The students are provided with four different case studies and simulated urine for each patient. They perform a urinalysis on each sample.

Ward's® Simulating Urinalysis Kit | VWR

In this lab activity, students explore the core life science concepts of Structures and Properties (LS1) and Heredity (LS3) while determining the blood type of WARD'S completely safe and non-toxic Simulated Blood.

Simulated ABO Blood Typing Kit | Ward's Science

Students analyze simulated urine samples to understand the procedures used in urinalysis and the potential applicability of urinalysis as a diagnostic tool. By adding different reagents to urine samples, students observe how each reacts with substances in the urine, providing useful evidence for identifying different substances.
